Objective

A challenging position as a software engineer in order to fully utilize my experience and education in the field

Key Skills

Development:

- Active Server Pages
- VBScript
- ASP.NET
- Visual Basic.NET
- Visual Basic 6
- Java
- JavaScript
- PHP
- ColdFusion
- SQL
- Pascal
- MIPS
- C++/C#
- HTML

Server/User Software:

- Microsoft SQL Server
- Microsoft IIS 4.x - 6.x
- Microsoft Office 2000/2003
- Microsoft Visio
- Microsoft Visual Studio
- Microsoft Visual Studio.NET
- Microsoft Visual SourceSafe
- Macromedia HomeSite
- Macromedia Dreamweaver
- Oracle
- MySQL
- Adobe Photoshop/ImageReady
- Subversion
- DeepMetrix LiveSTATS

Certifications

Actively Pursuing

Microsoft Certified Solutions Developer (MCSD)

Currently Studying For

Microsoft Certified Professional (MCP)
Developing Web Applications with Visual Basic.NET

Education

Bachelor of Science - Computer Science (CIS Specialization)

University of West Florida - Pensacola, FL

Related Coursework:

- Database Systems
- Data Structures
- Programming Languages (Java, VB.NET, Pascal, C++, MIPS)
- Technical Writing

Achievements:

- Vice President, UWF chapter of the Association of Information Technology Professionals (AITP)

Associates of Arts – Computer Information Systems

Pensacola Junior College – Pensacola, FL

May 2003

Cumulative GPA 3.4

1998 – 1999

Web Developer/Web Page Designer

UniversalCom, Inc.
Destin, FL

Summary of Tenure –

I was hired as a web page designer, but shortly after I started, three of their web developers left to work for Microsoft, so I had to take over the majority of the programming projects.

Specific Achievements and Responsibilities:

- Redesigned signature UniversalCom websites such as PanamaCity.Com and EmeraldCoast.Com to enable searching, classified ads, chat rooms, and other database driven features.
- Created an online help/troubleshooting system for the technical support department in an attempt to cut down on the number of phone calls from customers.
- Developed a company Intranet that included a searchable phone list, discussion forums, and inventory tracking.
- Designed, programmed, and maintained websites for various customers, such as Flamingo Café, Buffalo's Reef, Sandestin Golf & Beach Resort, and Abbot Resorts.

1997 – 1998

Web Page Designer

Universal Tax Systems, Inc.
Rome, GA

Summary of Tenure –

For the most part, my sole responsibility here was to convert paper tax forms into their web-based equivalents.

Specific Achievements and Responsibilities:

- Converted tax forms into their HTML equivalents for SecureTax.Com, a branch of Universal Tax Systems that was later bought by Intuit (makers of Quicken & TurboTax).
- Created a regular expression search and replace that converted text-based help files (from their windows app) into HTML in seconds. It originally took an employee about four days to do it.

Additional Information

- Developed a text editor for the MIPS assembly language and am successfully selling it on my website: www.downcastsystems.com/mipster
- Created a website that contains sample code and tutorials on a variety of web programming topics: www.downcastsystems.com/devcenter
